## ABOUT ME

---

Product thinker drawn to enterprise platforms where complexity hides opportunity. I believe the best products earn daily use through intelligence, not obligation — and that the person building them should understand both the user's frustration and the system underneath. I want to own the decisions that shape what gets built and why.

## WORK EXPERIENCE

---

### Software Engineer (Product-Focused), Servicenow

02/2023 – Present  
Hyderabad

- Shaped CWM's core interaction model — owned foundational feature design, ensuring cross-system coherence across navigation, discovery, and execution layers.
- Delivered high-impact UI components (Agile, Column Config, Grid, Gantt, Docs) — drove adoption across enterprise workflows and influenced platform roadmap prioritization.
- Managed cross-functional release coordination — balanced speed to market with platform stability for downstream teams and customers.
- Translated customer needs into product requirements and roadmap decisions — coordinated 50+ escalations to validate feature prioritization; discovered and resolved a critical security gap in role-based approvals.
- Improved platform reliability — conducted root-cause analysis on 200+ defects and surfaced systemic issues that shaped component design decisions.

### Software Development Engineer, Amazon

05/2022 – 02/2023  
Gurgaon

- Worked on Seller Central — designed the bridge between identity verification and ML risk scoring, automating fraud detection decisions that were previously manual and time-consuming.
- Developed comprehensive security complaint documentation for the seller onboarding workflow.
- Simplified page rendering logic to improve load time and user experience.

### Power Programmar, Infosys

01/2021 – 05/2022

- Optimized data loading by 13% through scripting pipeline inputs and performing data transformations from multiple sources.

## SKILLS

---

### Product & Strategy

Product Vision & Roadmapping, OKR Definition, User Journey Design, Prioritization Frameworks, Data-Driven Decision Making

### Agile Project Management

Sprint Planning, Backlog Prioritization, Scope Documentation, Acceptance Criteria Definition, Defect Root-Cause Analysis, Release Coordination

### Communication & Influence

Cross-Functional Leadership, Data Storytelling, Dashboard Design, Process Mapping

### Technical Foundation

Full-Stack Development (Now Platform), Frontend Architecture (React, JavaScript), API & Component Design, Event-Driven Systems, SQL, AI-Assisted Development (Claude API)

## EDUCATION

---

BE CSE, UIET, Panjab University  
CGPA - 8.42

2016 – 2020  
Chandigarh
